

Implementing and Maintaining HACCP in your facility

Chapter 15: Organizing and Managing HACCP
HACCP A Systematic Approach to Food Safety

OFFICE OF THE TEXAS STATE CHEMIST
Texas Feed and Fertilizer Control Service • Agriculture Analytical Service

Structure for Organizing and Management of a HACCP plan

- **Who's in charge?**
 - QA/QC function
 - Food safety group
 - Operations

OFFICE OF THE TEXAS STATE CHEMIST

Management Responsibility:

- **Two key elements**
 1. Management commitment to producing safe food through HACCP
 2. Communication of this goal throughout the establishment
- **Evidence of support**
 - "Statement of Corporate Policy" & commitment of resources
 - On going review

OFFICE OF THE TEXAS STATE CHEMIST

HACCP Coordinator and HACCP Team

- **The HACCP Coordinator provides leadership and guidance for the development and implementation of the HACCP plan.**
- **Special skills: outlined in the preliminary steps**
- **Duties:**
 - Identifying trainers
 - Writing instructions and check lists
 - Reviewing HACCP records ...

OFFICE OF THE TEXAS STATE CHEMIST

HACCP Team

- **Selected by HACCP coordinator and management**
- **Strong operations representation**
- **Out sourcing when lacking technical expertise**
- **Primary duties: develop and maintain HACCP plan and system**

OFFICE OF THE TEXAS STATE CHEMIST

Strategy for developing a HACCP Plan

- **Careful planning, avoid being overwhelmed**
- **University assistance**
- **Review all operations, identify the approach first**

OFFICE OF THE TEXAS STATE CHEMIST

Strategy (continued)

- ❑ Develop a model plan for one product and one line
- ❑ Expand to entire plant covering all products/production lines

Implementing a HACCP Plan

- ❑ **Training**
 - Focus on knowledge and skills needed for the task
 - General overview of HACCP for all employees
- ❑ **Trial period**
 - Expect problems and be willing to review, evaluate and revise plan
 - Initial validation (formal review)
- ❑ **HACCP team to meet regularly during implementation**

Managing a HACCP Program

- ❑ Coordination of food safety operations
- ❑ System for evaluating new products
- ❑ System for evaluating product/process changes
- ❑ Day-to-day management
- ❑ Periodic evaluation and revision

Why do HACCP Systems Fail?

- ❑ **Inadequate documentation of the HACCP plan**
 - insufficient information for HA
 - no rationale for CCPs
 - no scientific justification for CLs
 - no justification for monitoring frequency

Food Processing Institute (FPI)

Why do HACCP Systems Fail?

- ❑ **Poor management of the HACCP program**
 - inadequate verification that the HACCP plan is being applied correctly and followed as written
 - lack of management support or employee buy-in
 - lack of appropriate record-keeping or records
 - inadequate training
 - complacency

Food Processing Institute (FPI)

Elements of success when developing and implementing a HACCP plan

- ❑ **Top Down Commitment**
- ❑ **Partnership**
- ❑ **Interdisciplinary**
- ❑ **Training**
- ❑ **Realistic Expectations**
- ❑ **Process**

Food Processing Institute (FPI)

Results from HACCP plan development and implementation in the feed industry

Hazards identified during HACCP plan development

- Prohibited animal protein
- Aflatoxin
- Inclusion of wrong medication
- Medication cross-contamination
- Wrong labels

OFFICE OF THE TEXAS STATE CHEMIST

13

Results from HACCP plan development and implementation in the feed industry

Critical control points (CCPs) identified during HACCP plan development

- Bulk receiving
- Mixer-batching
- Bagged receiving
- Bulk load out

16

Time spent developing HACCP plans

	Average	Std Dev
Person Hours Spent on HACCP Plan Design	72.93	37.27
Person Hours Spent on HACCP Training	24.43	22.20
Person Hours Spent Monitoring Facilities for Compliance with HACCP Plan	70.86	59.35
Person Hours Spent Analyzing Lab Data Related to HACCP Plan	24.21	23.32
Person Hours Reviewing HACCP Plan	16.36	17.01
Person Hours Spent Keeping Records Associated with HACCP Plan	59.50	53.26
Total Person Hours Related to HACCP Plan & Training	268.29	101.97

17

Other insights

One CEO expected that HACCP would provide a marketing benefit. He found that the increased confidence of his employees resulted from their involvement in developing and implementing a HACCP plan. As a result, this confidence carried over into all areas of manufacturing, sales, and service and benefited all areas of the company including increased sales, without having to actively promote their adoption of HACCP.
